Umbria Grechetto IGT

**Grape variety:**

100% grechetto di Todi (G5 clone), from sustainable farming

**Vineyards specifications:**

single vineyard planted in 1990 with guyot training system, east/south-east exposure, white clay, limestone and chalky soils

**Plant density and yield:**

6.500 plants/hectare with a production of 1,25 kg of grapes per plant (80 quintals/hectare)

**Harvest:**

totally hand-picked in the second week of September

**Winemaking:**

the grapes are gently destemmed and pressed, the must naturally decants for 12/24 hours and the fermentation takes place with wild yeast in stainless steel tank, where temperatures are strictly controlled

**Ageing:**

12 months in amphoras and neutral large barrels of Slavonian oak in contact with the fine lees, it doesn't go through the malolactic fermentation and, after being bottled, it refines at the least 6 months in the bottle
